

Energy Efficiency Tailored to You

AEP Ohio's High Efficiency for Low-income Program (HELP) helps eligible customers reduce their utility costs with low- or no-cost efficient products and services.

What can I upgrade with HELP?

Heating, Ventilation and Cooling Equipment

Water Heaters

Washers and Dryers

Refrigerators and Freezers

Lighting

Advanced Thermostats

Water-Saving Products

Insulation

Air Sealing and Weatherization

Benefits of an Energy-Efficient Home

- Heating and air conditioning use less energy to keep your home comfortable
- Advanced thermostats manage energy used to heat and cool your home
- Insulation, air sealing and weatherization keep conditioned air inside and shield from outside elements
- Water heater upgrades provide more consistent temperatures and use less energy
- Efficient lights use less electricity and last longer
- Water-saving, low flow products reduce waste - decreasing water, water heating & sewer bills
- Energy-efficient appliances deliver reliable performance while reducing energy consumption

A HELPing Hand

Making your home more energy efficient can be expensive and time consuming. That's why HELP is designed to support you through every step of the upgrade process, with services that include:

- A free in-home energy assessment
- A customized home energy report
- Free or discounted products and installation depending on eligibility level
- Support from a HELP Home Energy Assessor

Plus, you can continue working with your Home Energy Assessor to install larger equipment upgrades as you continue your savings journey.
